

Contract manufacturing: Reliability, experience, flexibility

Polymerisation:

Emulsion and solution polymerization
1'000–15'000 l

Mixing

Reactive PUR, epoxy, silane-terminated systems – 1C or 2C aqueous systems

Pilot plant:

Polymerisation 50–150 l

Certificate:

ISO 9001:2015
ISO 14001:2015

Do you want to manufacture innovative chemical-technical products but lack the resources? As a renowned production company in the adhesives industry, we offer customised contract manufacturing. Whether you are a large company, an SME or a start-up without your own production facilities - we understand your needs. We support companies in the manufacture of chemical-technical products with emulsion polymerisation, solution polymerisation and mixing.

Contract manufacturing at Collano offers you the following advantages and benefits:

- Faster market entry thanks to free production capacities and flexibility.
- Avoidance of investment risks and tied-up capital by outsourcing small quantities.
- Partnership-based support from tests to industrial production.
- Suitable facilities from polymerisation to pilot plants for special chemical-technical products.

Visit us at Sempach Station in Switzerland. Here, our team of production specialists is ready to turn your vision into reality. With decades of in-depth production expertise and a keen instinct for specialised technologies, we represent the highest industrial standards.
