

Collano HP 3100

Degreasing and Cleaning Agent

Characteristics

Base

Water-soluble, neutral cleaning agent

Form

Liquid

Flammability

Ignition point 190 °C

Storage

4 years in the unopened original packaging
at 15–25 °C (frost susceptible)

Application area and materials

Degreases autogloss and polishing wax layers. Cleans oil blurred areas. Degreases and cleans metal, removes pencil marks on synthetic resin, does not remove hard-dried PUR adhesives on tools and material.

Application

When bonding cleaned surfaces, subsequent cleaning with water is needed.

When used as basic cleaner (stripping agent):

Mix 1 part by weight of Collano HP 3100 and 4 parts by weight of water.

Apply the mixture using a spray bottle or cloth.

Additional details

Check the material being cleaned for stability when coming into contact with Collano HP 3100.

Safety

Follow the instructions on the Safety Data Sheet

Packaging

Plastic bottles 1 lt

Guarantee

We guarantee the consistency and faultless quality of this product, manufactured in accordance with ISO quality standards, which has been developed on the basis of our long standing experience with the recommended applications under the specified conditions. Material, processing, and application conditions may significantly influence product properties. Pre-application tests by the user are therefore essential. For non-specified applications or deviations in application conditions, we recommend that Collano's technical support service be consulted first. Collano's general sales and delivery terms and conditions shall apply.
